## Dose Administration Aid service provision

The following is a guide to providing Service Provision Data for Dose Administration Aid claims.

### Service Provision

Data Required	Claim Accepted	Claim Declined	Comments
Patient Medicare/DVA Number	11 digit Medicare number or a DVA number	If numbers entered are not a valid Medicare or DVA number	Medicare number must include all 10 digits plus the patient reference number (the number next to their name on the card).
Date of service	Date of service provision in DD/MM/YYYY format	Anything other than DD/MM/YYYY format	This is the pack start date, not the date of packing or the date the pack was provided to the patient. The pack start date allows weekly claims while recognising that at times, multiple packs may be prepared and supplied at one time.
